

# DD Superlight Jungle Hammock

Fully-modular: The all-in-one

**Waterproof layer**

**Ultralight**

**Breathable**

**Bug proof**

**knot free system**

**Pockets**

The DD Superlight Jungle Hammock is our top-of-the-range camping system that offers everything you need, while weighing just 1.5kg. With a double-layered base, fully detachable mosquito net and additional waterproof layer, the Jungle Hammock is an ideal solution for cyclists, backpackers, tropical camping, or for anyone seeking a complete lightweight kit that packs into one small bag!

## Specs

**SIZE:**  
2.7m x 1.4m  
(comfortable for people up to 6ft 5in/198cm and 125kg)

**PACKED SIZE:**  
40cm x 12cm x 12cm

**WEIGHT:**  
1730g

**COLOUR:**  
Olive green

## Features

- Detachable fine-mesh **mosquito net** designed to keep out even the tiniest of insects
- Full-width curved **spreader poles**, to create maximum space inside and suspend the net
- 4 large tabs on each corner of the base to support the spreader poles
- Breathable **double-layer base** – ideal for inserting insulation / camping mat if required
- One 3m guy line and two 2m elastic cord to structure the mosquito net
- Detachable **waterproof layer** – use underneath for bivi camping or overhead as a compact tarp
- Pre-fitted with our easy-to-use, lightweight **Whoopie Suspension System** (RRP £28), with our Superlight karabiners, weighing just 8g instead of climbing karabiners normally included with the Whoopie Suspension System.
- 4 **internal pockets** for small valuables and one larger suspended pocket above
- Compression **stuff sack** for easy storage

# A fully-modular camping system

Both the mosquito net and the extra waterproof layer are detachable, making this our most customisable and versatile hammock model yet! Giving you the best bits of our most popular hammocks in one package, it suits a wide range of activities and really does serve the whole year round.

Take the Jungle Hammock with you in your hiking backpack for a quick-setup camping solution on the trail. Bring it with you while mountain biking, to minimise carrying weight. Or, if you don't have an adventure planned just yet, detach the net and use the base for lounging comfortably in the open!

## Set-up options

### Bug free hammock

Ideal for camping in hot climates – remove the waterproof layer for extra breathability, and insert the poles through the sleeves on the mosquito net to suspend it above you, slotting the ends of the poles into the four large side tabs on the hammock.

Secure the ends of the net by drawing it in with its cords, and tying that cord around the ends of both the net and the hammock.

### Rain protection

Use the waterproof layer on the top of the hammock, with or without the mosquito net attached. Fit the loops on the canopy to the pole attachment webbing, inboard of the poles (you will need to remove the poles from the eyelet to do this)

Note: The waterproof layer provided is intended for use as a compact rain cover. If you need waterproof protection underneath too, additional waterproof layers are available for purchase.

### Basic open hammock

(weighs only 500g)

Remove the mosquito net, poles, and waterproof layer and you are left with a 2-layer open hammock weighing only 500g.

### Ground bivi

Use the waterproof layer on the bottom (attached with the Velcro patches) as a groundsheet - this will create an insect proof ground bivi. You can weatherproof this set-up from above with an additional canopy (sold separately) or one of our DD Tarps.
