

# DD Frontline Hammock

Bug-proof and breathable

Versatile

Compact

Breathable

Bug proof

Our popular DD Frontline Hammock is a versatile and tough double-layered design, with a breathable base and its mosquito net built in – making it ideal for use in various climates, including the Jungle.

With the webbing pre-fitted and spreader poles/elastic included to raise the net, the Frontline’s ease of setup makes it a great all-round system suitable for users with any level of hammock camping experience.

### How does it work?

Sleep 100% bug-free with the Frontline’s insect net zipped up, or simply unzip both sides and roll up to secure out of the way. Alternatively, suspend the hammock with the net on the bottom to lounge out in the sun!

### SIZE:

2.7m x 1.4m  
 (comfortable for people up to 6ft 5in and 125kg)

### PACKED SIZE:

24cm x 14cm x 6cm

### WEIGHT:

860g

### COLOUR:

Olive green,  
 Coyote brown,  
 Sunset orange,  
 Jet black,  
 MC

### FEATURES:

- Breathable, zip-closed double-layered design – lie between the layers to cocoon yourself, or insert a partially-inflated thermarest or camping mat between the layers in cooler weather
- Ultra-fine mesh mosquito net built in: protects against all insects (even the smallest!)
- Two internal hanging loops on the net, for torches, glasses etc
- Foldable lightweight spreader poles and two 2m lengths of elastic, to suspend the net
- Two double-sided zippers for easy open and close
- Four internal pockets to store small valuables
- Four tabs on each corner of the base, from which to suspend equipment or hang an underblanket
- Pre-fitted with 10 metres of strong suspension webbing (5m each end)
- 4 Loops to hang small bags from the hammock
- Hanging loops inside the mosquito net at either end to hang light items from (glasses, torch, small bag etc.)
- Stuff sack

# DD Frontline Hammock set-up options.

## Bug free hammock

*Completely insect and mosquito free sleeping system*

- To lift the bug net up - simply tie one end of the elastic cord (included) to the central loop near the spreader pole sleeves, another end can be tied to either suspension, tarp or tree.
- To spread out the mosquito net creating more room inside the hammock - insert the spreader poles into the sleeves.
- Tie the mosquito net up above the hammock if it is not needed.

*Three loops near the spreader pole sleeve allow you to put a stick in instead of the poles.*

## Basic open hammock

To lie out in the open simply flip the hammock over so the mosquito net is underneath (please remove the mosquito net poles before doing this).

Using it this way you can also use it as a seat during the day.

## Ground / bed set-up

The Frontline Hammock can also be easily set up as a bivi on the ground, or used on a bed for protection against mosquitos. If setting up on the ground, you will need two sticks / supports to tie the mosquito net to and keep it suspended above the hammock, and we also recommend using a ground sheet beneath you on wet ground.

## Insulation.

The two layer base allows you to insert a thermarest / foam camping mat between the two layers as insulation in colder weather. There are also three velcro patches to close the two layers which helps to keep your insulation in place.

*In hammocks the majority of heat loss is felt from below due to the compression of the loft in your clothing / sleeping bag by your body weight.*
