

DD Frontline Hammock - MC

Bug-proof and breathable

Versatile

Compact

Breathable

Bug proof

Camouflage

Pockets

Our popular DD Frontline Hammock - MC is a versatile and tough double-layered design, with a breathable base and its mosquito net built in – making it ideal for use in various climates, including the Jungle. The DD Multicam pattern excels at blending in to a huge variety of natural and woodland backgrounds, so this hammock is ideal for wildlife photographers, the armed forces, or those who just wish to keep their favourite campsite hidden.

Specs

SIZE:
2.7m x 1.4m
(comfortable for people up to 6ft 5in and 125kg)

PACKED SIZE:
28cm x 17cm x 12cm

WEIGHT:
860g
(excluding webbing & poles)

COLOUR:
DD Multicam

Features

- **Breathable**, double-layered design with velcro tab closure – lie between the layers to cocoon yourself, or insert a partially-inflated Inflatable Mat between the layers in cooler weather
- Ultra-fine mesh **mosquito net** built in: zips closed and protects against all insects (even the Scottish midge!) - suspended with 60cm spreader poles for a roomy interior!
- 2 x foldable lightweight 60cm **spreader poles** and 2 x 2m lengths of elastic, to suspend the net
- 2 x **double-sided zippers** for easy open and close
- 2 x internal **hanging loops** for torches, glasses...
- 4 **internal pockets** to store small valuables - these can be used in any hammock set-up configuration!
- 4 **tabs** on each corner of the base - to peg out, to suspend equipment from or to fit a DD Underblanket
- Pre-fitted with 10m strong **suspension webbing** (5m each end)
- Stuff **sack**

How does it work?

Sleep 100% bug-free with the Frontline's insect net zipped up, or simply unzip both sides and roll up to secure out of the way. Alternatively, suspend the hammock with the net on the bottom to lounge out in the sun!

Set-Up Options

Bug free hammock

Completely insect and mosquito free sleeping system

To lift the bug net up - simply tie one end of the elastic cord (included) to the central loop near the spreader pole sleeves, another end can be tied to either suspension, tarp or tree.

To spread out the mosquito net creating more room inside the hammock - insert the spreader poles into the sleeves.

Tie the mosquito net up above the hammock if it is not needed.

Basic open hammock

To lie out in the open simply flip the hammock over so the mosquito net is underneath (please remove the mosquito net poles before doing this).

Using it this way you can also use it as a seat during the day.

Ground / bed set-up

The Frontline Hammock can also be easily set up as a bivi on the ground, or used on a bed for protection against mosquitos. If setting up on the ground, you will need two sticks / supports to tie the mosquito net to and keep it suspended above the hammock, and we also recommend using a ground sheet beneath you on wet ground.

Insulation

The two layer base allows you to insert a thermarest / foam camping mat between the two layers as insulation in colder weather. There are also three velcro patches to close the two layers which helps to keep your insulation in place.

In hammocks the majority of heat loss is felt from below due to the compression of the loft in your clothing / sleeping bag by your body weight.

(shown below in Olive green, but the same principle applies to the MC version)
